LUSITANO

Para a Bruma a poupança de água é, mais do que uma preocupação, é uma obrigação.

Todas as nossas torneiras estão equipadas com sistemas de controlo de caudal que, misturando ar com a água, transmitem a mesma sensação de conforto de um grande caudal, mas usando uma quantidade menor de água. A Bruma coloca ainda ao dispor dos gestores de projectos, diversas soluções à medida que permitem controlar o caudal ou temperatura da água, de acordo com as características, necessidades e aspirações desses mesmos projectos.

Desta forma, facilitamos e promovemos uma utilização racional da água e da energia necessária ao aquecimento da mesma. Isto traduz-se num acto de poupança de água, energia e dinheiro.

Somos o primeiro produtor português a desenvolver e promover torneiras em aço inoxidável com a preocupação de proteger o meio ambiente.

Os modelos Inox, que se destinam à cozinha, não transferem sabor ou elementos tóxicos para a água e são 100% recicláveis. São características principais do aço inoxidável a resistência, a fácil manutenção e o aspecto moderno.

For BRUMA saving water is more than just a concern, it is our obligation. All our faucets are equipped with systems that save water by reducing the water flow and by adding air to the water stream, while producing a soft touch and non-splashing sensation. BRUMA works closely with project managers, tailoring solutions specifically to the unique requirements of the consumer or characteristics of their project. By offering solutions for flowrate and hot water control, it's much easier to promote energy efficiency and a rational use of water.

Pour Bruma l'épargne d'eau est, plutôt qu'un souci, une question de devoir. Tous nos robinets sont équipés de systèmes de contrôle de débit, lesquels, en ajoutant de l'air à l'eau, proportionnent la même sensation de confort d'un grand débit, en utilisant, cependant, beaucoup moins d'eau. Bruma met encore à disposition des gestionnaires de projets, plusieurs solutions sur mesure qui permettent de contrôler le débit ou la température de l'eau, selon les caractéristiques, besoins et aspirations de ces projets. Ainsi, nous rendons facile et nous promovons une utilisation rationnelle de l'eau et de l'énergie nécessaire à son chauffage. Cela se traduit en épargne d'eau, d'énergie et d'argent.

Para Bruma, el ahorro de agua es, más que una preocupación, una obligación. Todos nuestros grifos están equipadas con sistemas de control de caudal que, al mezclar el aire con el agua, transmiten la misma sensación de confort de un gran caudal, pero utilizando una cantidad de agua que es menor. Bruma también pone a disposición de los directores de proyectos, distintas soluciones, a la misma vez que permiten el control del caudal o de la temperatura del agua, de acuerdo a las características, necesidades y objetivos de esos proyectos. Así, facilitamos y promovemos una utilización racional del agua y de la energía necesaria a su calentamiento. Resulta en un ahorro de agua, energía y dinero.
